Kolb Bauhaus lightning revival

Zalaba Design's award-winning Kolb collection is a modernisation of the [Otto Kolb](#) Bauhaus Classique's. After moving to New York Kolb became friends with

Mies Van der Rohr and Charles Eames. They are the pioneers of the American New Bauhaus movement.

During Milano Design Week 2023 Zalaba Design launches the Kolb lightning revival. Kolb's Bauhaus lamp designs of the 50s manifest themselves in joint and connection studies – the organic component of human limb function. The Kolb [mobile ceiling lamp](#) cones can be swivelled in numerous directions. Also the [table lamp](#) has a flexible lighting fixtures and becomes a wall lamp when hooked upside down to creating the perfect ambiance for any occasion. Each lamp provides direct and indirect ample lighting while also making a statement of modern design in any room.

"We are excited to represent Swiss design at SaloneSatellite to the global furniture market and curious to see how the design scene will interact." said Ginger Zalaba - designer and CEO of Zalaba Design.

Bauhaus Daughter

[Ginger Zalaba](#) graduated with a master's degree in Exhibition Design from the Zurich University of the Arts. In addition, she studied Interior Design at IED Milan. At the young age of twenty-six, she became CEO of the Zurich-based family business [Zalaba Design](#) specializing in modern interior design and bespoke furniture production.

In honor of her grandfather - Bauhaus pioneer [Otto Kolb](#) - Zalaba took over his legacy with the ambition to modernize it and to bring back in vogue the Bauhaus style. The recovery of Kolb's almost forgotten mid-century modern designs is perhaps one of the last Bauhaus furniture revivals. International exhibitions led to a collaboration with Walter Knoll and various design awards.
